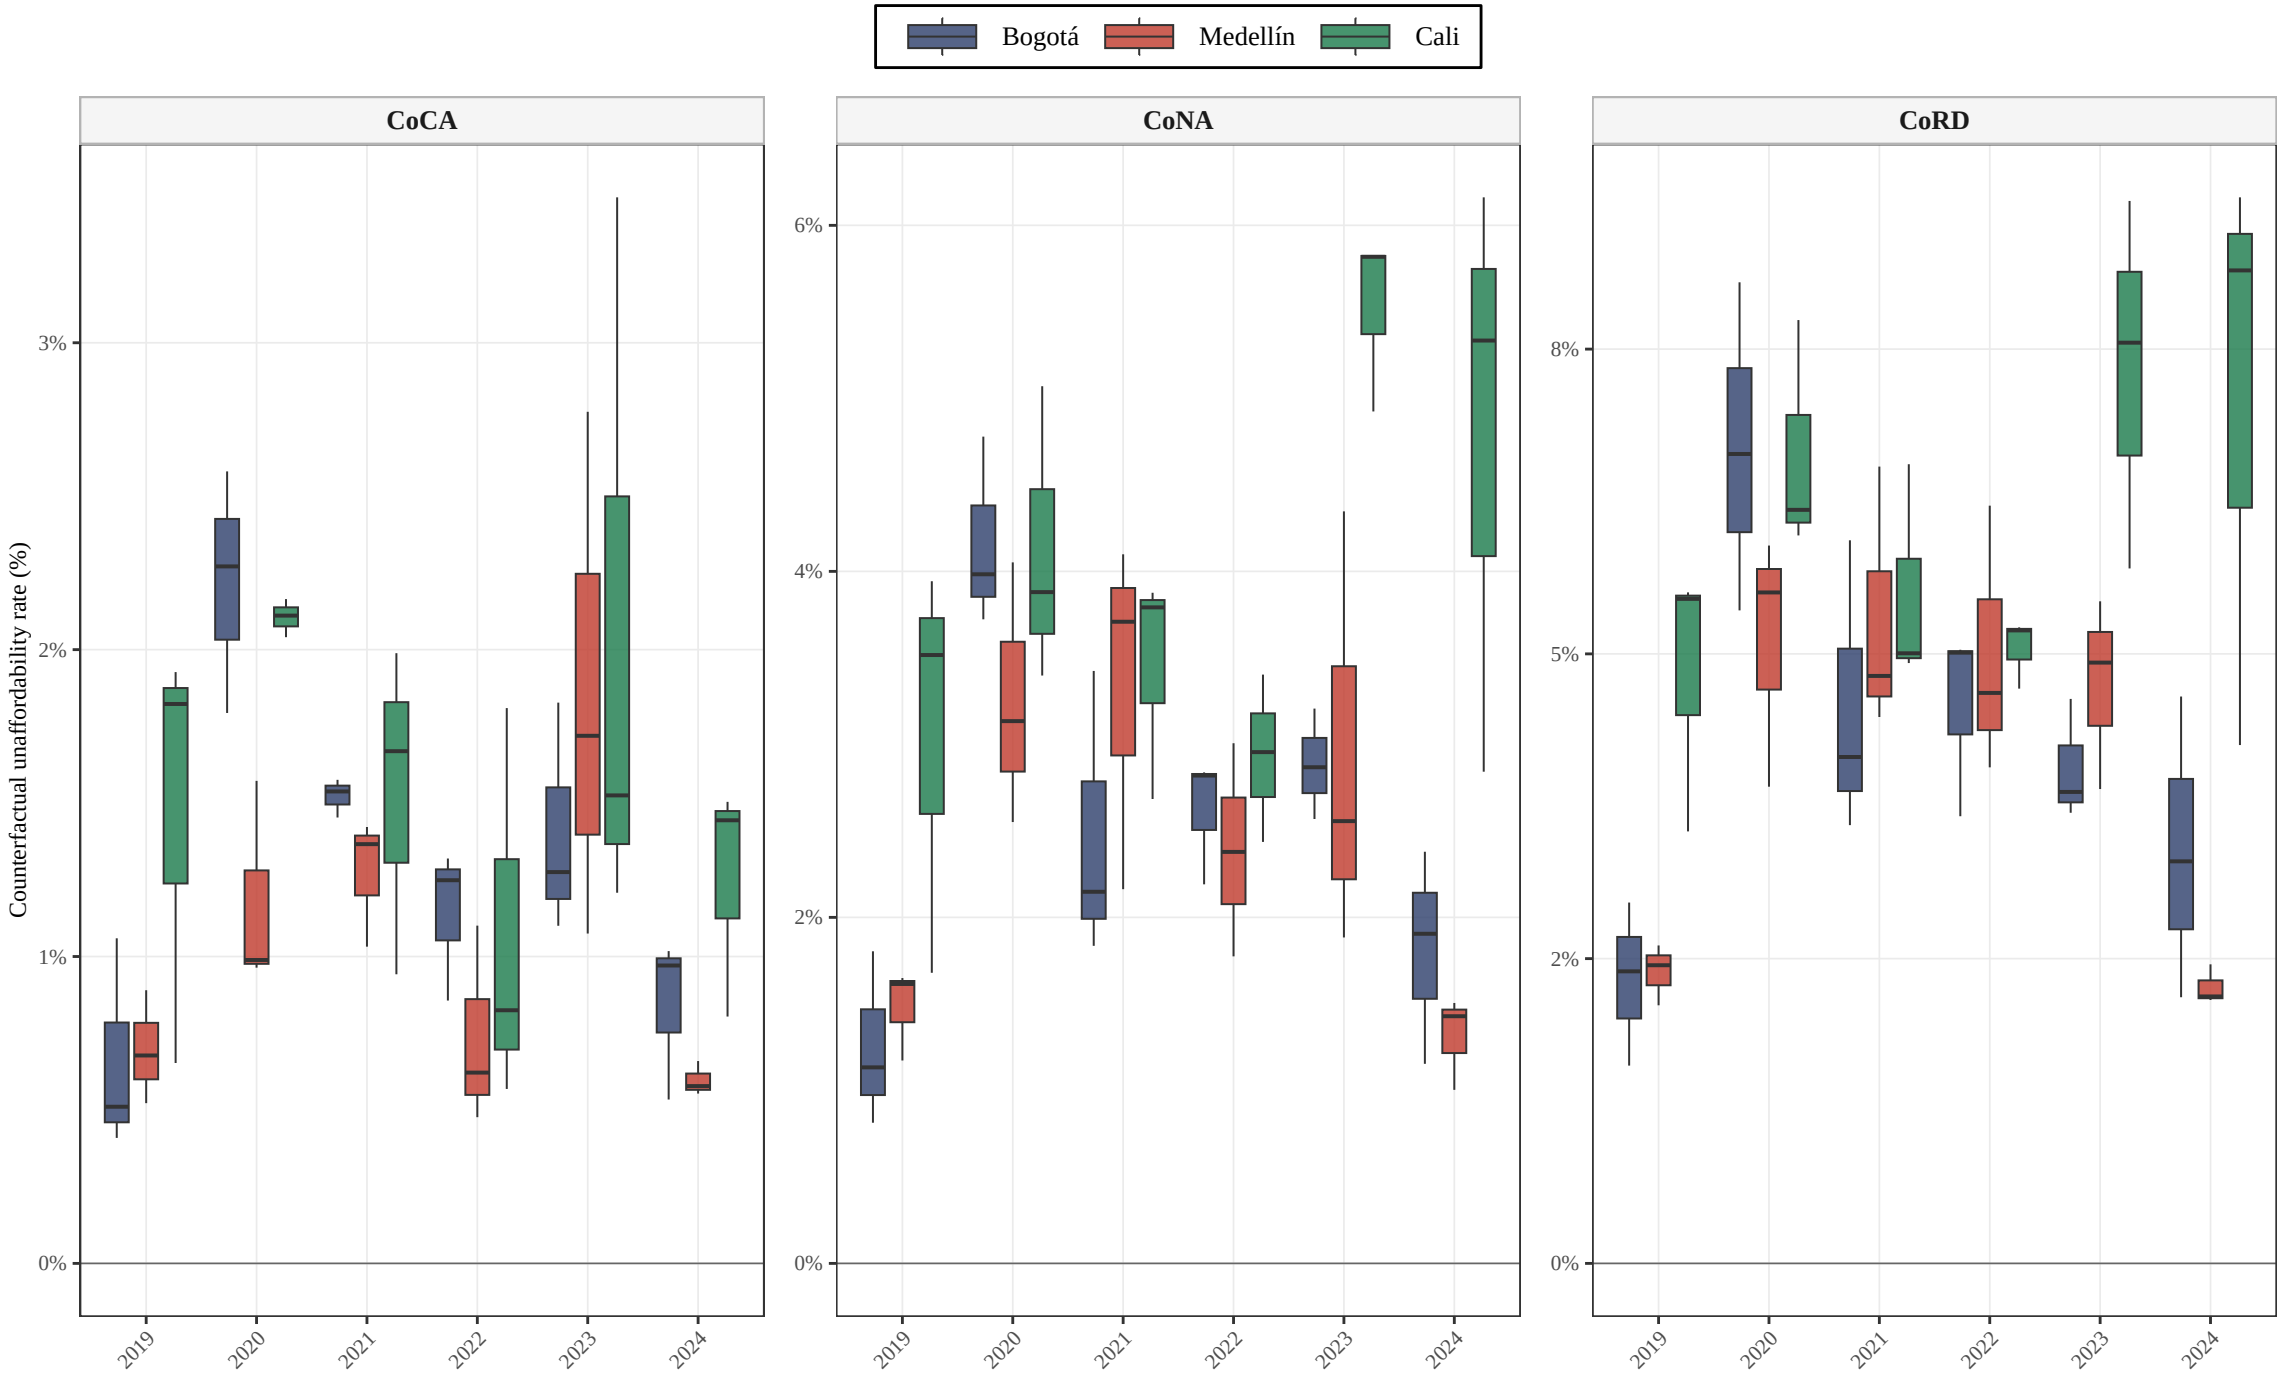
Figure A. Counterfactual unaffordability rate by city and diet model, 2019–2024

Distribution of monthly rates across the year. Numbers below x−axis = annual median per city. Each observation = mean rate across income deciles in one month.



Note: Counterfactual unaffordability rate (FGT0) = share of households whose annual per capita income is below the annual per capita diet cost.
Box = IQR; whiskers = 1.5×IQR; dots = outliers. CoCA = Cost of Caloric Adequacy; CoNA = Cost of Nutritional Adequacy; CoRD = Cost of Recommended Diet.
