

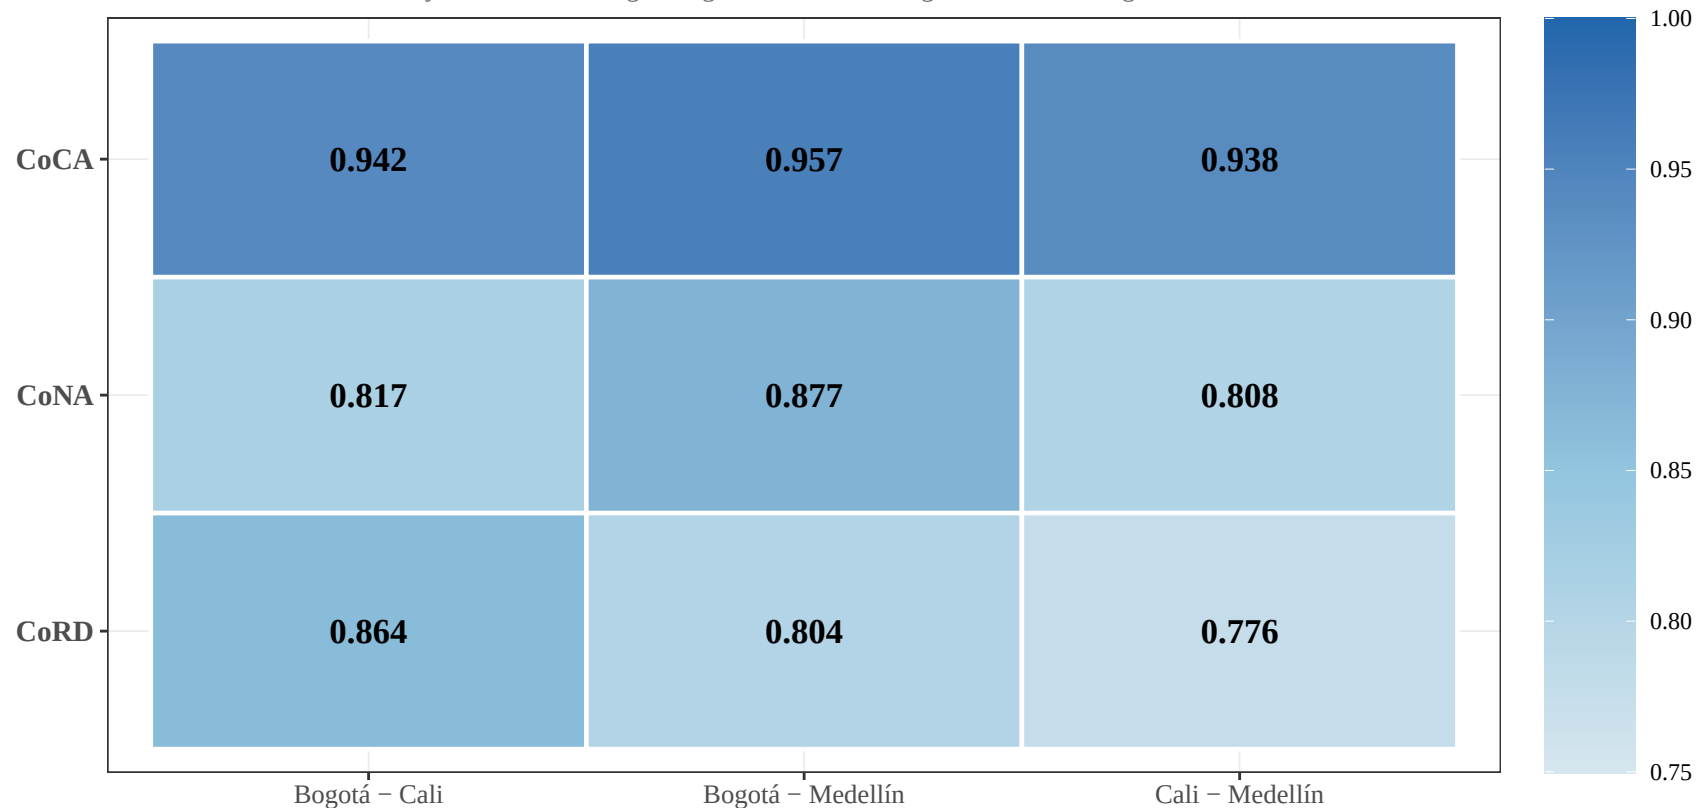

Figure 1D. Pairwise correlations of real year-on-year cost changes between cities, 2020–2024

Pearson correlation of monthly real YoY % changes. Higher values indicate greater market integration.

Note: Real YoY % change = $(\text{cost}_t / \text{cost}_{\{t-12\}} - 1) \times 100$, deflated by city-level food CPI (base: December 2018).

CoCA = Cost of Caloric Adequacy; CoNA = Cost of Nutritional Adequacy; CoRD = Cost of Recommended Diet.
