

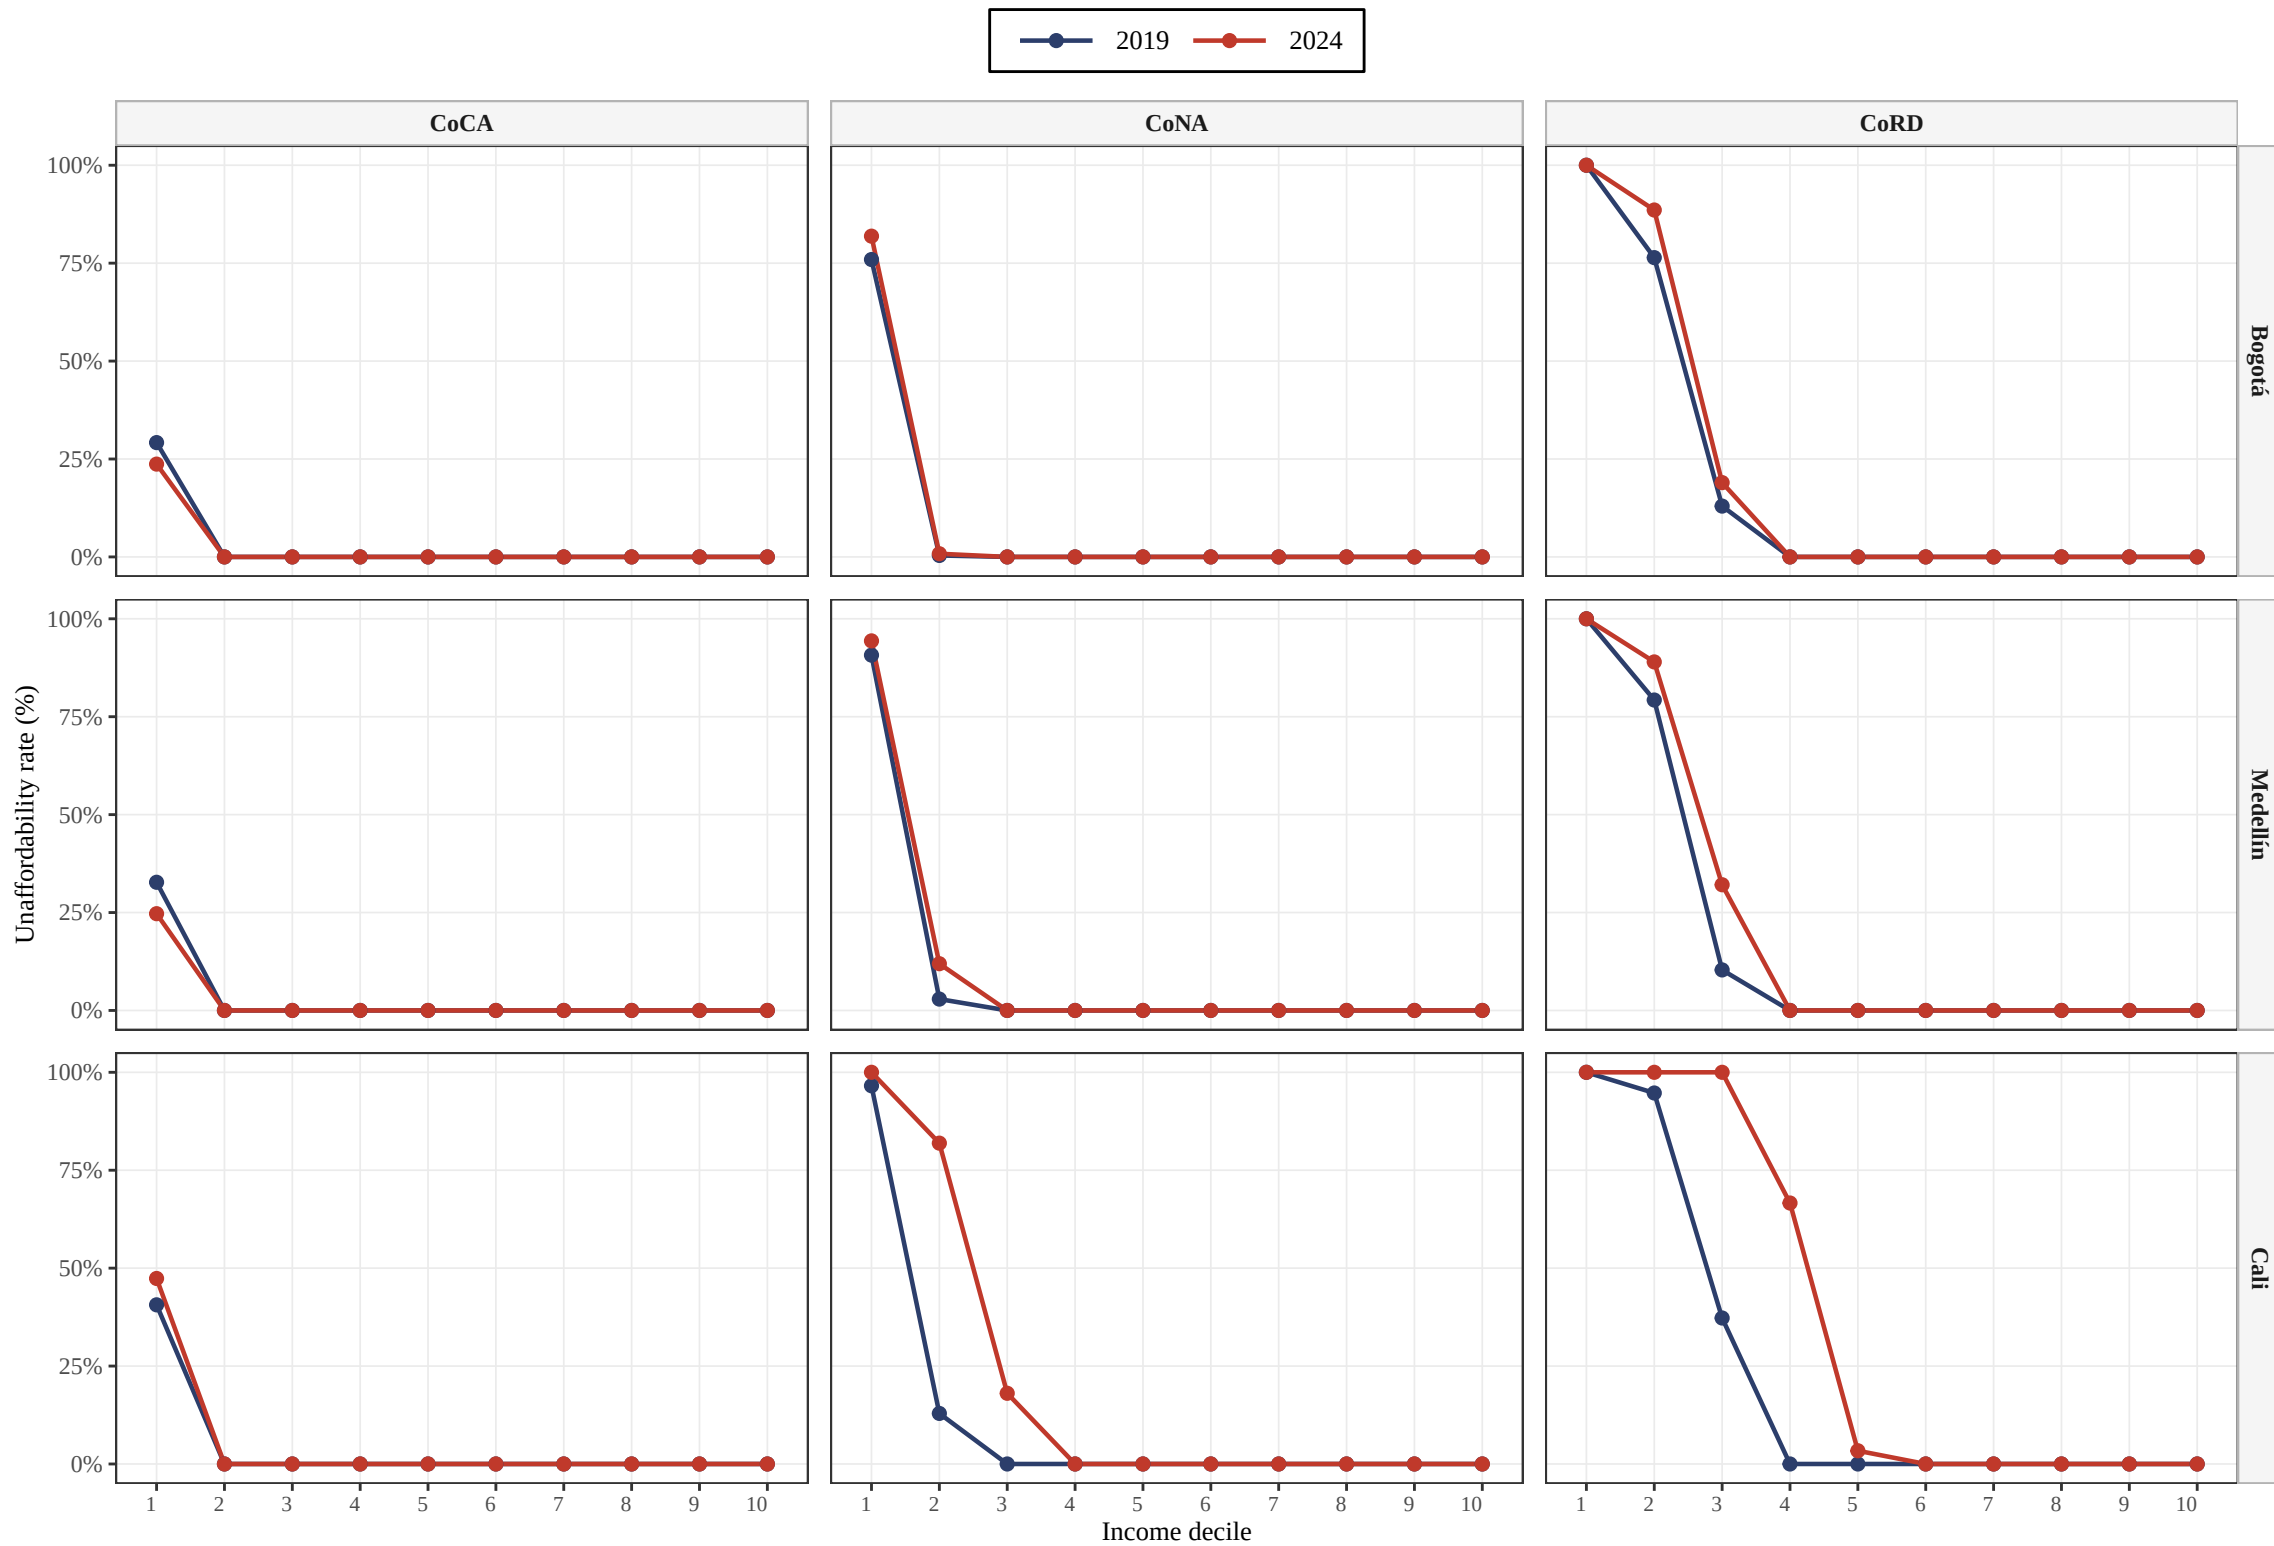

Figure 8. Household unaffordability rate by income decile and city, 2019 vs 2024

Share of households unable to afford each diet. Comparison before and after the inflationary episode.

Note: Unaffordability rate = share of households in each decile whose annual food expenditure per capita is below the annual diet cost (FGT0).

CoCA = Cost of Caloric Adequacy; CoNA = Cost of Nutritional Adequacy; CoRD = Cost of Recommended Diet.

Annual mean computed over monthly observations within each year.
